

Inhibited BioGlycol Heat Transfer Fluids

Process Applications

- HVAC/R
- Food & beverage
- Solar Applications
- Thermal Storage
- Process cooling & heating
- Ice & snow melting systems
- Refrigeration systems
- Line heaters
- Plastic extrusion
- Geothermal energy
- Winterization
- Cooling towers

Dynalene BioGlycol Series Overview

Dynalene BioGlycol products are comprised of inhibited and uninhibited BioGlycol solutions. It is a domestically produced, non-toxic, renewably sourced fluid and provides 30% lower viscosity at low temperatures compared to traditional petroleum-derived propylene glycol. Dynalene BioGlycol offers greater thermal stability while possessing similar or better thermophysical properties compared to ethylene and propylene glycols. It offers better performance than propylene glycol while giving its users an environmentally safer product than ethylene glycol. We only use high quality virgin glycol in our glycol products, never recycled. All raw materials are tested and approved by our quality control department prior to use.

Properly used and maintained, Dynalene BioGlycols provide excellent thermophysical properties while protecting your system from corrosion and degradation. Each individual BioGlycol-based product has its own advantages, and custom blends can be readily made to meet your system's requirements.

Product	Description	Temperature Range
Dynalene BioGlycol	Inhibited BioGlycol	-50°F to 350°F / -46°C to 177°C
Dynalene Raw BioGlycol	Uninhibited BioGlycol	-50°F to 350°F / -46°C to 177°C
Dynalene Solar Glycol-XT	High-temperature BioGlycol-based fluid for solar systems	-50°F to 350°F / -46°C to 177°C
Dynalene GeoGlycol	High-temperature BioGlycol-based fluid for geothermal systems	-50°F to 350°F / -46°C to 177°C

Corrosion Protection

Dynalene's inhibited BioGlycol products utilize a unique corrosion inhibitor package made from non-toxic raw materials. These inhibitors offer superior corrosion protection for most metals including carbon steel, brass, copper, stainless steel, cast iron, and many other alloys by creating a passive layer on the surface that contacts the Dynalene BioGlycol and prevents corrosion from forming. It also stabilizes the pH of the fluid, keeping it in the range that is suitable for the metals in your system.

Price, Quantity, & Availability

Dynalene BioGlycol products are offered in 1, 2.5, 5, 30, 55, and 265 gallon containers as well as 5,000 gallon tankers. Pricing depends on quantity, however, Dynalene, Inc. will work with you to try and fit your budget.

Dynalene's Fluid Care Program

Coupling our Dynalene fluids with a fluid care program can extend the life of your systems significantly. We offer yearly testing of the heat transfer fluid in your system and tracks the changes in the fluid year to year so adjustments can be made to keep your system working at its best.

Freezing points of BioGlycol solutions:

Vol% BioGlycol	Freezing Point
5	-2°C (29°F)
15	-4°C (25°F)
25	-9°C (16°F)
35	-15°C (5°F)
50	-27°C (-17°F)
65	-46°C (-50°F)
75	-49°C (-57°F)
85	-53°C (-64°F)

Dynalene only uses deionized water when blending our glycol-water mixtures:

Water Ion	Dynalene Spec
Chloride	< 25 ppm
Sulfate	< 25 ppm
Other	< 50 ppm

General Properties

	Dynalene BioGlycol	Dynalene Raw BioGlycol	Dynalene Solar Glycol-XT
pH (50% BioGlycol)	8.5 – 9.5	8.5 – 9.5	9.5 – 10.5
Reserve Alkalinity (50% BioGlycol)	>10.5 mL	0 mL	>25.0 mL
Operating Range (50% BioGlycol)	-50 to 350°F	-50 to 350°F	-50 to 350°F
Flash Point (50% BioGlycol)	None	None	None
Color	Clear	Clear	Clear
Odor	Little or none	Little or none	Little or none
